SUMMARY

Software engineer with two years of experience in both backend and frontend parts of web and mobile software development. Self-taught, proactive and committed to personal improvement. Looking forward to collaborate in new projects in order to gain more experience and learn new things, not only about software engineering but other fields as well.

SKILLS

Programming languages and technologies: Javascript, Python, HTML, CSS, MongoDB, SQL, React, React Native, Node js, Next js, Express js.

Languages: Spanish (native), Fluent English (613 score in TOEFL ITP).

EXPERIENCE

Software Developer Engineer June 2023 – Present
Foxconn PCE Technology Ciudad Juárez, Chih, MX

- Fullstack applications development using FAST API as backend service and React JS + Next JS as frontend frameworks.
- Software requirements gathering from internal stakeholders.
- Maintenance to applications built in Javascript with Vue.js framework.

Frontend / Mobile Developer June 2022 – June 2023
Evolución Ventamóvil Ciudad Juárez, Chih, MX

- Development of an eCommerce module for the sale of SIM cards and electronic devices in Axios Mobile's CRM, built with Javascript, Next js, React js, CSS and HTML.
- Built a mobile app for Android and iOS used by Evolución Ventamovil's vendors for product sales and users network management, built with Javascript and React Native.

Desarrollador Backend Septiembre 2021 – Junio 2022
Evolución Ventamóvil Ciudad Juarez, Chih, MX

- Built a RESTful API with Javascript, Express js, Node js and MongoDB, which serves the mobile and web apps of a Mexican cellphone carrier (Axios Mobile).
- Development of a micro service using Node js and SOAP for the automation of the porting process (cellphone carrier switch), managing up to 130 daily ports.
- RESTful APIs and SOAP based web services for the integration of external services.
- Software requirements gathering with internal company members.
- Collaboration with team members in order to design new features for the project.

Fullstack Developer January 2021 – April 2021
Consejo Estatal de Población del Estado de Chihuahua Ciudad Juarez, Chih, MX

- Development of a fullstack app using Javascript, Node js, Express js and MongoDB as backend and React js as frontend, this system was used to capture migrant people data and to generate statistical graphics with this data.
- Deployment of a web app using a Linux server hosted in a Digital Ocean droplet.
